

NETWORK & INFRASTRUCTURE SYSTEM ADMINISTRATOR // SMART ENERGY

FULL-TIME POSITION

SINGAPORE

COMPANY INFORMATION

BeeBryte is using artificial intelligence, IoT and Blockchain to get commercial buildings and factories to consume electricity in a smarter, more efficient and cheaper way while reducing carbon footprint.

Our software-as-a-service is minimizing utility bills with automatic control of heating-cooling equipment (e.g. HVAC) and/or batteries. Based on weather forecast, occupancy and energy price signals, BeeBryte generates up to 40% savings.

We have offices in Singapore & Lyon/France. BeeBryte was initially accelerated by Intel and one of its shareholders is CNR (the largest renewable energy producer in France).

Our mission is to empower customers to gain access to cheaper, cleaner and smarter energy by re-inventing the electricity future with both digital and business model innovations.

Come & join us!! www.BeeBryte.com

POSITION AND JOB INFORMATION

We are recruiting a Network & Infrastructure System Administrator based in our Singapore office (One-North MRT).

You'll report to the head of IT in France and work with various teams in different locations, time zones and cultures.

Your main missions will be:

- System engineering in a Linux environment, automation with Salt,
- Operational maintenance of the distributed infrastructure with two physical sites, Lyon (France) and Singapore, as well as hosted services and IoT Gateways installed at customers' premises,
- Support and assistance to employees for their workstations,
- Monitoring and management of the network architecture, organized in a "bastion",
- Technology watch to ensure cyber security and to contribute to the improvement of the infrastructure.

QUALIFICATIONS

- You have a Bachelor (or equivalent or higher) degree in computer science, and you have in-depth knowledge of system and network administration.
- You have experience in Linux administration. Knowledge in "rolling" or "source-based" Linux distribution are desirable,
- You have good knowledge of networks, monitoring and cyber security,
- You have already used deployment & automation tools like Salt or Ansible, Puppet, Chef,
- Knowledge in Python, C, shell is required. Knowledge of other languages used for internal services such as GO, Ruby or PHP will be appreciated,
- A hosting service management practice or PaaS is desirable,
- You are rigorous, curious
- Quality is one of your key drivers (documentation, code)
- Fluency in English is essential for this position. French is a plus.
- You are allowed to work in Singapore

WHAT WE OFFER

If you choose to come and work for us, we will offer:

- a welcoming and inclusive environment
- extensive development opportunities

You will work in the artificial intelligence field applied to the energy sector, join a fast-growing start-up and be part of its spearheading team and quickly take on responsibilities.

HOW TO APPLY?

Please send:

- your cover letter;
- an updated CV;
- your availability date;
- your salary expectations.

To: patrick.leguilliette@beebryte.com

Applications without cover letter will not be considered

Make sure you indicate why you want to join BeeBryte and why you think we should hire you.

Only shortlisted candidates will be contacted.
